Dear Bikeway Projects

A CBD BUG member has drawn to our attention several reconstructed driveway entrances to commercial properties outbound on Annerley Road as part of the bikeways project. These entrances all seem to have a significantly raised lip that could potentially catch the front tyre of a bicycle crossing them at an acute angle. It is currently unclear whether the new bitumen road surface will ensure these lips become flush with the carriageway.

We note there has been a recent bicycle crash at the Queens Wharf development that involved a driveway crossing of similar dimensions which led to the person involved being hospitalised. We understand that legal proceedings seeking compensation are currently underway.

We urge you to ensure that all newly constructed driveway crossings are made flush with the carriageway as part of the project.

Yours faithfully

Dr Richard Bean
