Dear Bikeway Projects

The CBD BUG is very pleased that the HSW cycling corridor is being repaved with bituminous asphaltic concrete. It was noted on Thursday that a "Speed Control Platform/Speed Bump" was installed on the ramp/walkway up from the New Farm Riverwalk. According to the plans available on the Council Website the ramp/walkway is already at 1 in 21. The CBD BUG has been informed that this may not be compliant with Disability Discrimination Act with regard to AS1428.

The CBD BUG would greatly appreciate if this is compliant with the Standard which clauses are relevant.

Please find attached a marked up photo of the "Speed Control Platform/Speed Bump" & a marked up plan indicating the ramp/walkway slope and the approximate location of the "Speed Control Platform/Speed Bump".

Sincerely

Paul French
