Dear Mr Campbell

The Queensland Government is committed to restoring confidence in our public transport system by improving the affordability, reliability and frequency of public transport.

As the Assistant Minister for Public Transport, I have undertaken a review of all of the advisory committees under the Department of Transport and Main Roads portfolio to make sure they are in keeping with the government's current and future priorities.

As a result, the role, scope and membership of the Public Transport Advisory Group has been revised to focus on public transport issues that impact on specific user groups. As such, the group will no longer include individual public transport champions in its membership.

I would like to acknowledge the important contribution you made in your previous role as the Public Transport Champion for Brisbane North. I hope that you will continue to advocate for public transport matters in your local community and encourage you to provide feedback to TransLink where you feel improvements could be made to improve customer outcomes.

Thank you once again for your time and contribution.

Yours sincerely

Steve Minnikin MP
Assistant Minister for Public Transport
